Guideline information

Checking sea containers at post-harvest facilities

December 2016

Containers

- Increasing amount of containers arriving at coolstores
- Already thoroughly inspected at an MPI Approved Transitional Facility
- Already a Zespri phytosanitary requirement to check the inside of containers
- Makes sense to check the outside of containers
- Ensure Health and Safety!

Check the door seals

If you find a “Most Unwanted”:

- If possible – catch or collect and place into a zip-lock plastic bag
- If found inside; close the container
- Alert your phytosanitary compliance officer
- MPI hotline 0800 80 99 66
- KVH 0800 665 825

White peach scale

Spotted wing drosophila

Queensland fruit fly

Ceratocystis fimbriata

Verticillium wilt

Brown marmorated stink bug
