Site visits

Workstream: Surveillance

Site visits responsibilities

In a response site visits are conducted to raise awareness and carry out inspections to assess site risk. Sites may be in urban areas (houses/businesses) or rural (orchards/farms). Training will be provided on arrival (e.g. data recording).

- ✓ Prepare for and conduct assigned site visits
- ✓ Record site visit
- ✓ Ensure information is recorded in a timely and accurate manner

Site visits requirements

Team member:

- ✓ Be a team player
- ✓ Effective communicator - people skills, ability to relate to the public without causing alarm
- ✓ Have competent map reading skills (including google maps)
- ✓ Experience in monitoring for pests and plant identification skills are desirable

Team leader:

In addition to meeting the requirements of a team member, team leaders should also have:

- ✓ Knowledge and experience in people management
- ✓ Proven planning skills and sound decision-making
- ✓ Ability to work under pressure in a way that inspires others to do their best

Personal attributes

People who can:

- ✓ Keep calm under pressure - be flexible in responding to assigned tasks
- ✓ Work well on their own and as part of a team, be cooperative and tolerant with a positive attitude
- ✓ Follow instructions and act within the scope of their responsibilities
- ✓ Make sound independent decisions when they need to, and consult when they need to -and know the difference
- ✓ Have high personal integrity that includes maintaining confidentiality
- ✓ Be physically fit and agile – be able to undertake field work for extended periods in all weather. A current NZ driver licence and mobile phone may be necessary

Must be able to

- ✓ Travel and stay away from home for up to 7 days at a time
- ✓ Work after hours and during weekends

Kiwifruit industry roles that may contribute this capability

- ✓ Zespri Quality Assessors
- ✓ Quality Controllers
- ✓ Pest monitoring staff
- ✓ Quality Managers and Internal auditors
- ✓ Industry technical staff
