Total expenditure	2,253,098	1,893,815	2,221,299

2018/2019 proposed budget

1. The levy income is based on 140 million trays, being 50% green, and 50% gold
2. GIA operational agreement costs includes readiness costs of \$235,000 for Fruit fly, and an additional \$100,000 for both the Kiwifruit Sector and BMSB O
3. Wild kiwifruit costs have been increased by \$100k to \$200k following consultation with the industry, and the regional council reviewing its pest manager
4. The levies have been reversed but collectively are the same as 16/17 i.e. NPMP levy income 0.6 of a cent per tray
5. KVH intended to build reserves of \$1.5 million (50% of GIA response liability costs) to be able to fund its committed share of costs
6. NPMP working capital is sufficient to fund the deficit in the 17/18 FY until the levy structure can be corrected

2017/2018 revised forecast

1. Original approved budget was for KVH Inc and KVH Foundation and to different cost centres than what is being used since we have moved all activities to
2. Tray numbers decreased from approved budgeted 140 million trays to predicted 122 million trays so levy
2. Biosecurity funding includes 177k from Foundation reserves from FY 16/17 that will be used to pay for biosecurity activities now undertaken by KVH Inc
3. Recharge costs have been applied between NPMP and Biosecurity to reflect the correct amount of time and effort going into biosecurity
4. Operational Agreement costs under GIA have been reduced to 120k based on cost recovery not yet being
5. R&D costs for wider biosecurity have been removed following Zespri's agreement to pick up the costs
