

South Island *Neonectria* update

Thursday 11 February 2021
Conference Room, Motueka Top 10, 15 Fearon St, Motueka
Followed by orchard visit at 130 Wildman, Motueka

The aim of this workshop is for KVH, Zespri and Plant & Food Research scientists to reconnect with South Island growers to understand what is happening on the ground in the region in regard to *Neonectria*; and provide you with the latest knowledge from research conducted on *Neonectria* and other organisms associated with vine decline.
